

Parlevel Systems OCS Management Platform

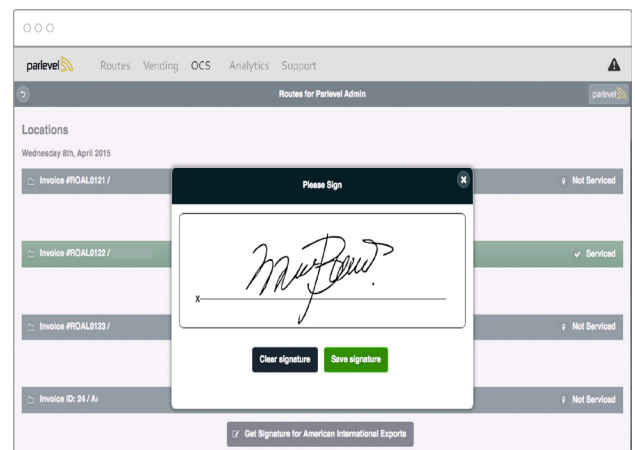

The OCS management system you've been waiting for

With powerful tools like paperless customer invoices, detailed equipment tracking, and insightful analytics, Parlevel's OCS management solution makes running office coffee service easier and more profitable than ever.

Go Paperless

Say goodbye to the pen and paper and say hello to digital customer invoices

- Record invoices digitally and view them in one, easy-to-see location.
- Capture customer signatures from any smartphone or tablet; your customers can sign on the spot, and all of your invoices will be updated in real-time.
- Send your customers invoice reminders with the click of a button. One-click reminders will save you time and ensure you get payment quickly.

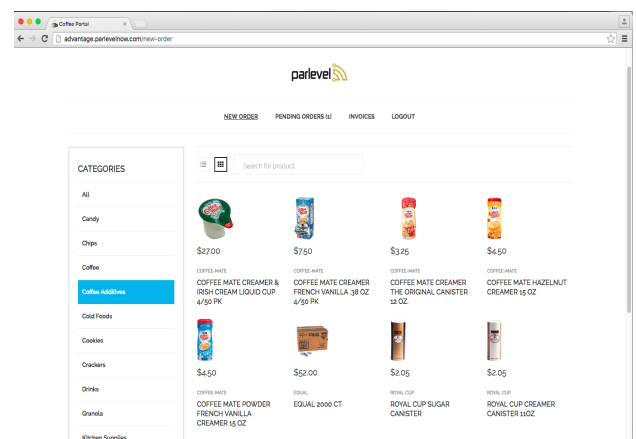

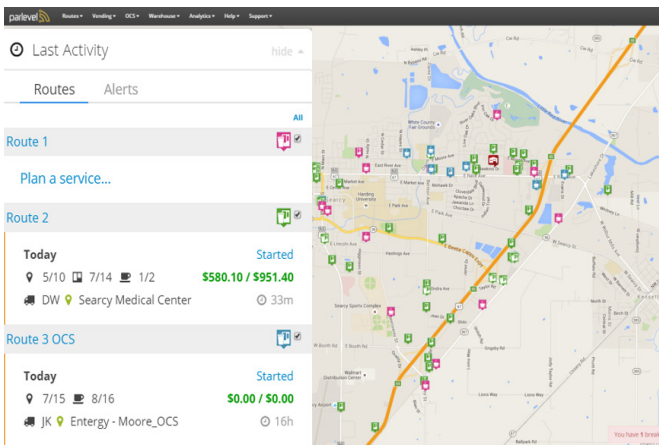

"With Parlevel's invoicing system, I don't have to hand write an invoice and then go back and enter it manually in my computer. I only have to enter data one time, which saves us a ton of time" - Mike Kever, Advantage Vending & Coffee Service

Customer Facing Portal

Your own personal web store. Increase customer engagement and sell more than ever

- Customers can browse your inventory and place orders through your own personalized e-store.
- Log in, browse inventory, and place order. It's that easy!
- Upsell your products and make it easier than ever for your customer to order the goods they need and the service they desire.

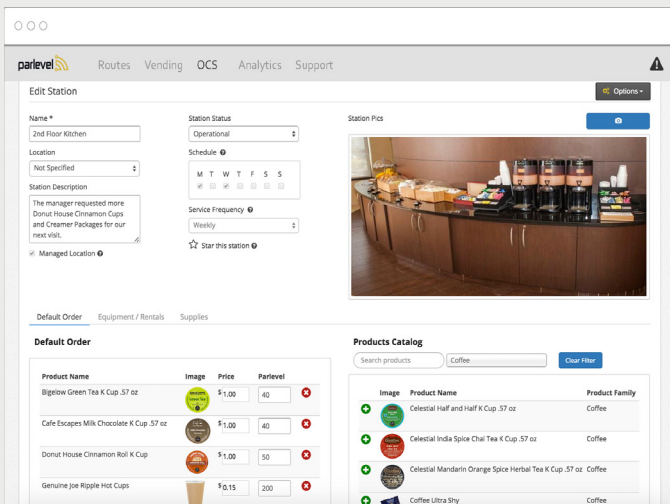

“We have customers seventy miles apart, so we recognized we needed a route management solution that would make sure customers are properly served, but also maximize our personnel and resources efficiently.” -GP Macerola, Rome’s Refreshments

Intuitive and Interactive Routing

Routing made easy. View and route all your locations in an interactive map

- Effectively route your office coffee stations through an interactive routing screen.
- Service OCS, vending, and micro market stations in the same route and in the same system.
- Add flexibility to how you service your routes, and manage your business lines the way you want.

Streamlined Equipment Tracking and Warehouse Management

Monitor your assets and gain control of your business

- Know exactly where your equipment is at all times with Parlevel.
- View asset lists and manage rental fees for your customers.
- Record inventory levels and ordering history with the warehouse module.

Totally Integrated Systems

All of your businesses - one powerful system

Now, you can manage all of your business lines - OCS, vending, and micro markets - in one powerful and easy-to-use system.

An integrated warehouse, combination routes, and detailed analytics empower you to access your entire operation in one place.

“Parlevel is unique in that many of the company’s executives have hands-on experience in the vending industry. This expertise made the decision to partner with Parlevel an easy one. We speak the same language and they know instinctively how to apply technology that will translate into results.”

-Bill Meckstroth, Midwest Refreshments
